Chris/Austin,

Regarding this request, in lieu of the requested documents, we also would accept access to the applicable API (Application Programming Interface) for each exchange account that Defendants participated in. If the API is available, we would need the API keys, access credentials, and any relevant documentation or guidelines for using the API to be able to retrieve the transaction history for your clients' exchange accounts.

We note that [REDACTED] offers [permissions configuration options](#) for their API Keys that would ensure that Plaintiffs obtain only read-only access to transaction data. Other platforms may offer similar options.

Please let me know if you have any questions or would like to discuss further.

Best,

David
